EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Wilson on 21 April 2010.

The application has been amended as follows:

1. (Currently Amended) A method for processing a video program having a first aspect ratio different from a second aspect ratio of a display, the method comprising the steps of:

specifying, at a first location, video conversion information for each of a stream of images comprising the video program, wherein the video conversion information dynamically changes across the stream of images and can be used to modify the video program from the first aspect ratio to the second aspect ratio and comprises manipulation information that specifies transformations relevant to a portion of the video program comprising a subset of the stream of images;

the video conversion information comprises first manipulation information and second manipulation information,

the first manipulation information specifies transformations relevant to a first portion of the video program comprising a first subset of the stream of image

integrating the video conversion information with the stream of images of the video program having the first aspect ratio to produce a combined set of video data, the combined set of video data formatted for viewing in both the first aspect ratio and in the second aspect ratio according to the conversion information;

transmitting the combined set of video data in a single stream to a second location geographically away from the first location; and

processing the transmitted single stream at the second location, wherein the single stream is formatted to conform with the second aspect ratio according to the conversion information or with first aspect ratio, as selectable by a receiving display device at the second location.

10. (Currently Amended) A video distribution system that distributes a stream of images comprising a video program in a first aspect ratio and includes information to convert the first aspect ratio to a second aspect ratio, the video distribution system comprising:

a distribution point configured to transmit, as a combined set of video data in a single stream, the video program and dynamically changing video conversion information for the stream of images comprising the video program, wherein the combined set of video data is formatted for viewing in both the first aspect ratio and in the second aspect ratio according to the conversion information **and the conversion information comprises manipulation information that specifies transformations**

relevant to a portion of the video program comprising a subset of the stream of images; and

a video converter remote from the distribution point, and configured to:

receive the transmitted single stream comprising the video conversion information and the video program from the distribution point; and

format the data to conform with the first aspect ratio or use the changing video conversion information to guide conversion for each of the stream of images between the first aspect ratio and the second aspect ratio, as selectable by the video converter.

The following is an examiner's statement of reasons for allowance: the prior art of record, including the newly-cited reference to Ito, generally discloses incorporating aspect ratio into the metadata for a program, but does not explicitly disclose that said information changes over time, nor does it disclose incorporating information to facilitate a transformation of a portion of said video program into said metadata, as amended. Ito discloses that the metadata can identify a region of interest for a particular video, but the instructions for any transformations to such regions are not encoded in the program metadata.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
